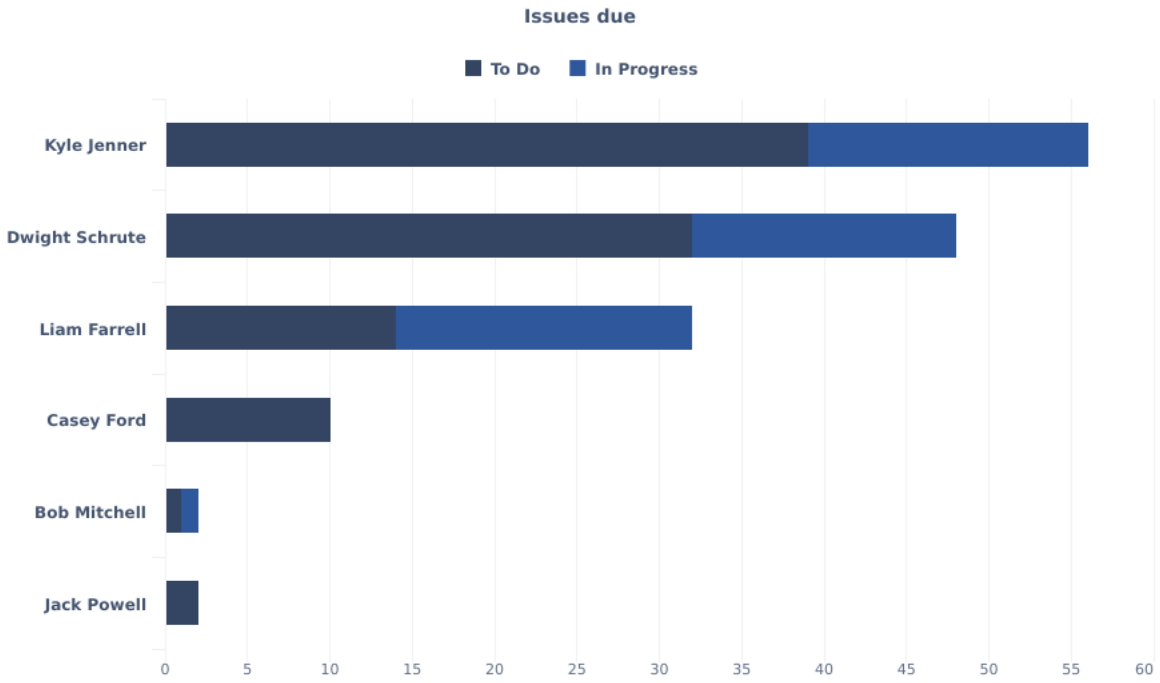
SpendIT App (Android)

How is the workload distributed among assignees?

Unresolved issues by assignee and status

An overview of unresolved issues, categorized by assignee and status. It helps identify workload distribution and prioritize tasks efficiently.

All Projects | Bob Mitchell, Casey Ford, Dwight Schrute, Jack Powell, Ky... | To Do, In Progress

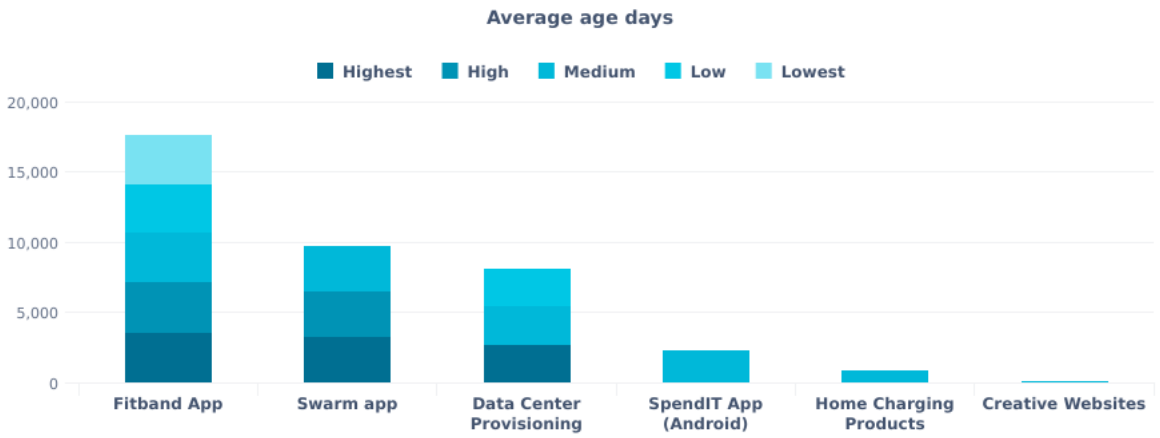


Which projects contain the slowest-resolved bugs?

Average age of unresolved bugs in projects

Highlight the projects containing the bugs that have been unresolved for the longest time.

Bug



At-risk issues distribution breakdown

Risk chart by status and priority

This chart displays the distribution of risks by status and priority, highlighting issues that are considered 'at risk.' At-risk issues are those that have remained in their current status for longer than the average resolution time, indicating potential delays or bottlenecks.

All Times | Beem for Business, Data Center Provisioning, SpendIT App ... | All Issue Types | All Assignees

Priority	Issues created		
	+ To Do	+ In Progress	+ Done
Highest	9	4	8
High	5		2
Medium	87	38	25
Low	13	5	6
Lowest	3		1

Project closest to completion

Predicted Completion Date

Rolling predicted date is based on how many open issues you have and progress in the last 4 weeks for the project closest to completion.

Data Center Provisioning
