

# [EBANK-3] Enter different data types

Created: 30/Jan/20 10:30 AM - Updated: 06/Mar/20 10:49 AM

<b>Status:</b>	In progress
<b>Project:</b>	E-Bank Portal

<b>Type:</b>	Test	<b>Priority:</b>	Medium
<b>Assignee:</b>	Owen Klyed		
<b>Labels:</b>	user-data, user-interface		

### Xray Test Details

**Test Repository Path:** /testing/2020/scenarios

**TestRunStatus:** FAIL

### Test Details

**Type:** Generic

**Definition:** **Test session goal**

The general purpose of this test is to filter out and reject values there are inappropriate, invalid or wrong type for a given input.

When testing the **"Phone Number"** input, put in a series of numbers that are not a phone number. Put in phone numbers that use dash character or other special characters. Use letters as phone number, both upper and lower case characters.

Since nothing else is acceptable then a valid phone number, you are looking for the errors here. The errors have to be displayed in every case and the wording, their language should convey the error message clear, so the user knows what is wrong and **why it is wrong**.

**Examples for wrong data type:**

- 555-0120
- #1234
- ABD-1234

**Expected error message:**

**Please input a valid phone number!**

### Test Sets

**Test Sets:** [\[EBANK-36\]](#) Security and compliance  
[\[EBANK-73\]](#) Internal security audit

### Test Plans

**Test Plans:** [\[EBANK-48\]](#) Features and security testing for versions after 1.1  
[\[EBANK-75\]](#) Features and security testing for versions after 1.2

Key	Fix Version/s	Executed By	Defects	Status
<a href="#">[EBANK-46]</a>	1.1	Bob Mitchell		EXECUTING
<a href="#">[EBANK-47]</a>	1.1	Levente Szabo		PASS
<a href="#">[EBANK-43]</a>	1.3	Bob Mitchell		PASS
<a href="#">[EBANK-44]</a>	1.2	Bob Mitchell		FAIL

I think we are **not being fully clear** on what area codes do we accept!  
 This way we confuse users and they won't understand if they can sign up or not.

I think we should:

1. Provide clearer explanation of what is a **valid** data
2. Display a friendlier warning when invalid data is submitted
3. Offer alternatives for certain data

*Zoe Barnes added a comment - 27/Feb/20 2:53 PM*

Yea, I can see why that is confusing. 😞

We should look into making this clear and maybe introduce a maps based area picker?
